Product description

A large model of a sailing ship made of stainless steel - One of our most beautiful works. The sailing ship is very carefully made, every even the smallest detail has been reproduced in accordance with the appearance of the majestic sailing ships from the old era. Everything is hand-made - the ropes of the masts are hand-woven from stainless steel, all ladders, cannons, sails, details on the deck are also made of stainless steel. The sheathing of the ship is made of hundreds of small elements combined into one majestic whole. At the front of the ship is a handcrafted sculpture of a knight, as was the case with real ships of that era. The degree of detail of the ship makes it a real pearl among all other models of sailing ships in the world. The ship is also very large, its dimensions are:

length 120 cm / 47 in

weight 22 kg / 48.5 lbs

Despite the large size, we can send the ship to any place in the world

The most beautiful sailing ship model in the world

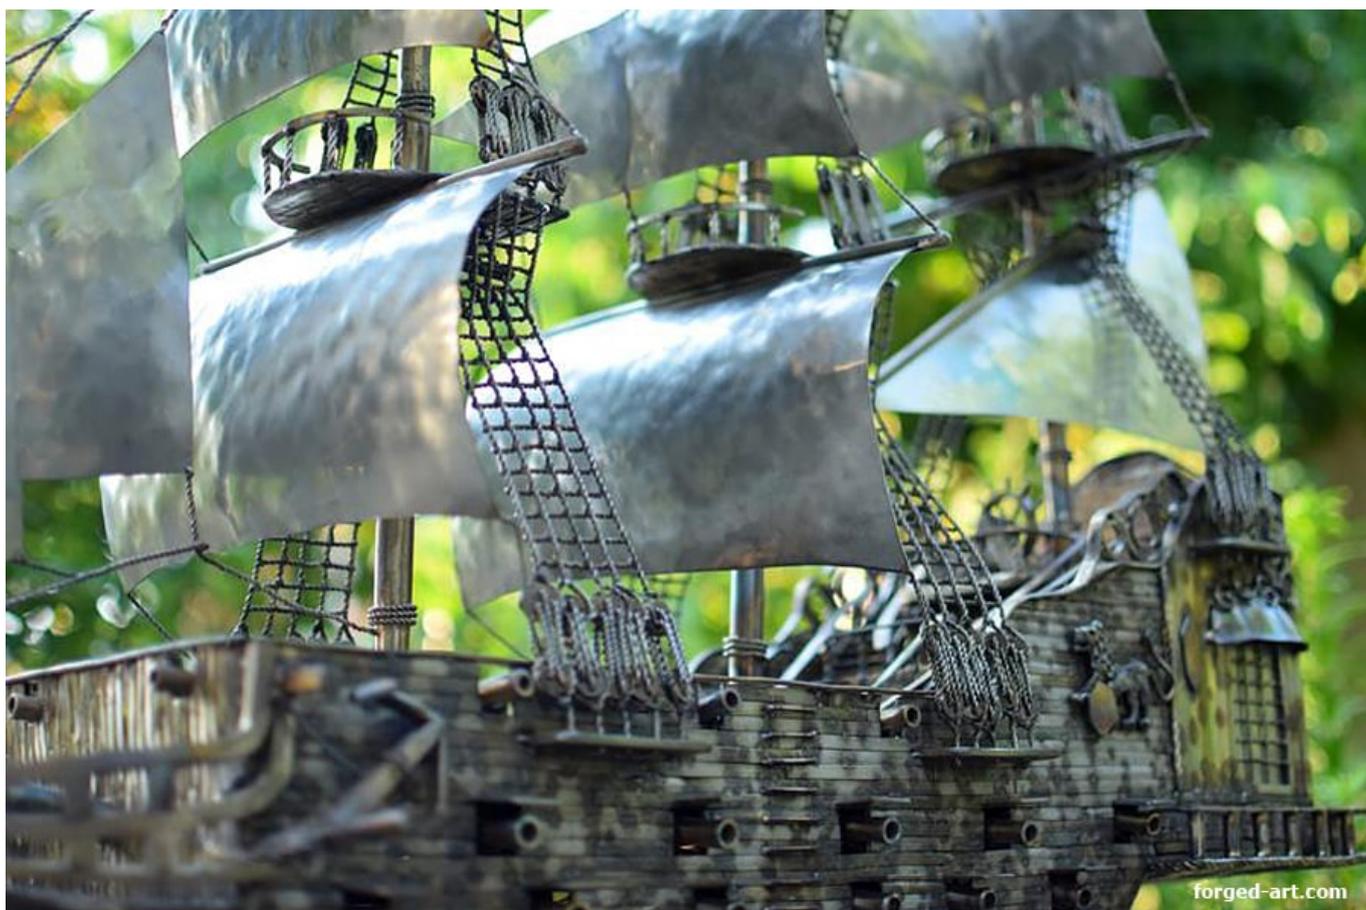

sailing ship - stainless steel sculpture

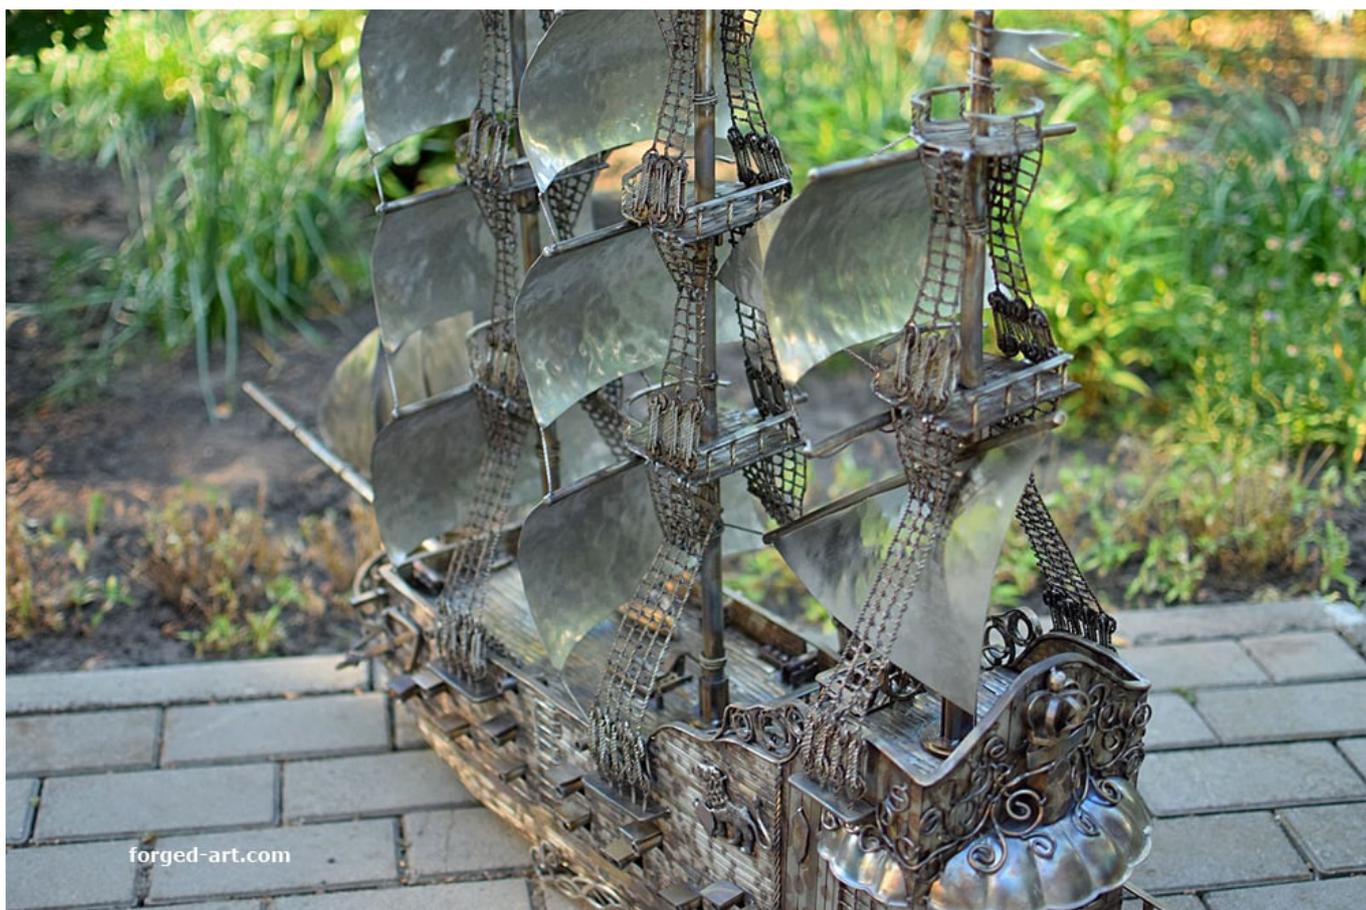

The ship has a lot of details

The ship is made of hundreds of hand-processed elements

The length of the sailing ship is 120 cm / 47 inches

Each element of the ship has been very accurately reproduced

We will make any model of a stainless steel ship for you, in any size. We make the most beautiful models of ships in the world.

The best blacksmiths and masters of artistic blacksmithing work in our studio.

We will answer all your questions, advise on the optimal size and form of the perfect sculpture for you.
